Summary

Motivated Associate Software Engineer with 14 months of experience (intern + full time) in full stack and backend development. Proficient in React.js, Node.js, Express.js, PostgreSQL and MongoDB. Experienced in building real world web applications including e-commerce platforms, task management systems and internal business tools. Actively leverage AI tools like ChatGPT, GitHub Copilot, Cursor and Claude to improve code quality and development workflow. Open to full stack and backend roles where I can contribute and grow.

Skills

Languages: Python, SQL, JavaScript, TypeScript, HTML, CSS

Frontend Technologies: React.js, Next.js, Bootstrap, Tailwind CSS

Backend & Database: Node.js, Express.js, MySQL, PostgreSQL, Prisma, TypeORM

Version Control: Git, Git Bash

Soft Skills: Adaptability, Emotional Intelligence, Critical Thinking

Education

Erode Sengunthar Engineering College Autonomous – B.Tech Artificial Intelligence And Data Science	Aug 2020 – May 2024
---	---------------------

Experience

Xlorit Innovations Private Limited Associate Software Engineer – Certificate	Oct 2025 – May 2026
---	---------------------

- Worked on backend development for an e-commerce platform.
- Contributed to a multi-tenant task management application.

Full Stack Developer Intern – Certificate	Mar 2025 – Sep 2025
--	---------------------

- Built multiple full stack web applications independently.
- Handled complete frontend to backend development solo on internal projects.

DesiCrew Solutions Private Limited Data Annotator Intern – Certificate	Dec 2023 – Apr 2024
---	---------------------

- Created accurate labeled datasets for 3D and 2D images, ensuring high quality.
- Followed project guidelines to maintain consistency and precision in annotations.
- Scrutinized and validated annotations to meet project standards.

Projects

Task Management App (<i>Personal Project</i>)	Live Demo github.com/Sudharsan-3
--	-------------------------------------

- Full stack task manager with user authentication and role based access for assigning, tracking and updating tasks.
- Admin can create, assign and edit tasks for users with separate dashboards for admin and user roles.
- Tools used: React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS.

E-Commerce App (<i>Personal Project</i>)	github.com/Sudharsan-3
---	------------------------

- E-commerce app with product listing, cart, order placement and real time inventory update on backend.
- Tools used: React.js, Node.js, Express.js, MongoDB.

Transaction Tracker *(Company Project)*

- Internal app to manage bank transactions with CSV/XLS upload, filters and ZIP export with screenshots.
- Role: Built complete frontend and backend independently with senior guidance.
- Tools used: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma.

Employee Guidance App *(Company Project)*

- Frontend app to guide new employees through Android and iOS system setup using design mockups.
- Tools used: React.js, Tailwind CSS, AWS S3.

Elitora — E-Commerce Platform *(Company Project)*

- Worked on backend APIs for an online shopping platform.
- Handled user authentication, admin product management and data fetching.
- Tools used: Node.js, Express.js, PostgreSQL, TypeORM.

Multi-Tenant Task Management App *(Company Project)*

- Worked on backend of a multi tenant task management system.
- Handled tenant isolation, role based access control and task management APIs.
- Tools used: Node.js, Express.js, PostgreSQL, Prisma.

Hobbies

- Building mini side projects and experimenting with new technologies.
- Exploring open source projects on GitHub.
